

EasyShop 1.31

nlstart,

A new bugfix release for EasyShop has been published: EasyShop v1.31.

Although the focus for this release was mainly bugfixing, a new feature has been introduced: you can style some shop elements with your style.css from your theme.

It should be possible for 1.3 or 1.2x users to directly upgrade to this version.

» New/Added Features:

- easyshop.php: added style class .easyshop_main_cat_name to style the Main Category Name
- easyshop.php: added style class .easyshop_cat_name to style the Category Name
- easyshop.php: added style class .easyshop_prod_name to style the Product Name
- easyshop.php: added style class .easyshop_prod_box to style the Product Detail left box
- easyshop.php: added style class .easyshop_prod_img to style the Product Image within Product Detail left box
- easyshop.php: added extra line breaks between category image and description
- easyshop.php: added style='padding:0 10px; margin-left:10px;' to legend form element; thanks mcpeace
- easyshop.php: added display of sku number at product details page
- admin_general_preferences_edit.php: added check on valid number format of minimum amount

» Altered Features:

- none

» Bugs Fixed:

- admin_general_preferences.php: proper formatting of minimum order amount
- admin_general_preferences_edit.php: insert of record #1 should be fixed properly
- easyshop_class.php: security: fixed check on variable because static already sets the variable; thanks KVN
- easyshop.php: deleted obsolete ` -sign from line 746; thanks mcpeace
- easyshop.php: various XHTML style improvements; thanks mcpeace
- easyshop.php: proper formatting of minimum order amount
- easyshop.php: added missing end div tag to allcat view mode for proper rendering
- easyshop_sql.php: table easyshop_preferences; changed field minimum_amount from INT into FLOAT
- easyshop_basket.php: handling of properties with spaces; thanks KVN

» Minor Changes:

- easyshop_class.php: typo in getCurrentVersion adjusted; thanks KVN
- admin_check_update.php: typo in getCurrentVersion adjusted
- plugin.php: fixed for correct upgrade to 1.31 (upgrade directly is possible for 1.2x users as well)
