

Searching for EasyShop testers

Hi start,

Since the programming part is a big job in itself I am constantly short of time doing all the tests myself as well. Therefore I'm looking for a couple of enthusiastic testers to form an EasyShop Test Team.

Requirements:

- » you have a test environment (preferably online)
- » you like to help the e107 community
- » you are willing to restore easysshop database files in case things fail drastically (you can use my plugins EasyBackup and/or EasyDBTool for that!)
- » preferably you are willing to test with PayPal IPN (Instant Payment Notification)
- » preferably you know how to use PayPal Sandbox test environment (not a must, but very handy)
- » preferably you have knowledge of downloading code updates from a SVN source list (not a must, but again very handy)

Please [contact me](#) and I'll be in touch with you shortly.
