

## How to add Twitter interactivity retweet to your news pages?

nlstart,

Twitter is 'hot'. So here's a very simple 'how to' instruction to add some Twitter interactivity to your e107 news pages.

1. create a new file e107\_themes/yourthemefolder/retweet.sc with following content:

```
$news_item = getcachedvars('current_news_item');  
return "<script type='text/javascript'>tweetmeme_url =  
'".SITEURL."news.php?item.". $news_item['news_id']. "'";  
</script><script type='text/javascript'  
src='http://tweetmeme.com/i/scripts/button.js'></script>";
```

2. at the top of your theme.php (e.g. under language include) add this line:

```
$register_sc[] = "RETWEET";
```

3. in your theme.php in section &#036;NEWSSTYLE use {RETWEET} E.g. behind  
{NEWSCOMMENTS}

Enjoy!
